Reading and writing

2026-10-19 | Week 2 | Show what changed

Grade 3 | TEKS 3.9D(i)

3.9D(i): Recognize characteristics and structures of informational text, including: the central idea with supporting evidence. In plain English: Identify an informational text's central idea and the details that support it. Today: Identify what the pumpkin book teaches us about.

Grade 4 | TEKS 4.8B

4.8B: Explain the interactions of the characters and the changes they undergo. In plain English: Explain how characters affect one another and how they change during the story. Today: Explain how an animal's help changes what the witch does.

I Do

Read a short, accessible scene from Big Pumpkin. Show a visual sequence strip: beginning, middle, end. Ask the shared WH question, "Who is here, where are they, and what happens first?" Model pointing to a picture, choosing an answer card, using AAC or dictating a sentence. Then connect the same scene to each learner's target: Grade 3 identify what the pumpkin book teaches us about.; Grade 4 explain how an animal's help changes what the witch does..

We Do

Reread the same scene aloud. Both learners use the same book, illustrations and three-part sequence mat. Ask who, what, where, when, why and how questions about the beginning, middle and end. Grade 3 arranges picture cards and answers with pointing, speech, AAC or dictation. Grade 4 explains the event, character action or evidence using the same page. Fade the model, switch teacher rotations, then revisit the visual sequence.

You Do

Use one fresh WH question about Big Pumpkin: "What happened at the beginning, middle or end, and how do you know?" Grade 3: Identify what the pumpkin book teaches us about. Grade 4: Explain how an animal's help changes what the witch does. Record the page or illustration, response mode, prompt level and whether the student identified the story-structure element.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: The learner not with the teacher uses a previously taught three-picture sequence, WH picture sort, character/setting match or known Vizzle task from Big Pumpkin. When finished, the learner may complete the week's book craft or quiet enrichment. The teacher then switches and teaches the other learner from the same scene.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Real books: Big Pumpkin. Bring the props and response mats in the weekly book guide.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

After the shared read-aloud and comprehension sequence, each learner makes an individual response from the same book. Grade 3: Identify what the pumpkin book teaches us about. Grade 4: Explain how an animal's help changes what the witch does. Offer large primary writing lines, a picture-to-sentence frame, tracing, dictation or AAC. Record composition separately from oral or picture evidence.

Visual WH and story-structure routine

Use the same book for both learners. Show who, what, where, when, why and how picture cards. Ask about the beginning, middle and end. Arrange three scene cards, then let each learner answer with pointing, AAC, speech, dictation or writing. Record the response mode and prompt level.

Craft or enrichment after comprehension

After comprehension, offer a simple book-connected craft: make a beginning-middle-end mini-book, build a character or setting collage, act out the problem and solution with props, or illustrate the favorite scene. Keep the visual sequence available and treat the craft as enrichment, not a replacement for the comprehension response.

8-9 AM read-aloud

Room on the Broom by Julia Donaldson. Return to the real pages for evidence; see the weekly book guide.

Math

2026-10-19 | Week 2 | Show what changed

Grade 3 | TEKS 3.4H, 3.4J

3.4H: Determine the number of objects in each group when a set of objects is partitioned into equal shares or a set of objects is shared equally. In plain English: Find how many objects are in each group after sharing equally. 3.4J: Determine a quotient using the relationship between multiplication and division. In plain English: Use a related multiplication fact to solve a division problem. Today: Share 6 counters between 2 plates, then show how many are in each group.

Grade 4 | TEKS 4.5A

4.5A: Represent multi-step problems involving the four operations with whole numbers using strip diagrams and equations with a letter standing for the unknown quantity. In plain English: Represent multi-step problems using the four operations, diagrams and equations with a letter for the unknown. Today: Model 3 bags of 2 pencils, then give away 2. Choose operations and show 4 left; use n for the unknown when ready.

I Do

Grade 3: Share 8 counters between 2 plates; each plate receives 4. Connect the model to 8 / 2 = 4. Grade 4: Act out 2 bags with 3 pencils each, then give away 1 pencil. Build a strip diagram; connect it to (2 x 3) - 1 = n. Find 5 pencils left. Begin with one step if needed.

We Do

Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations. Grade 3: after sharing 8 into 2 equal groups, use 2 x 4 = 8 to explain why 8 / 2 = 4.

You Do

Grade 3: Share 6 counters between 2 plates, then show how many are in each group. Grade 4: Model 3 bags of 2 pencils, then give away 2. Choose operations and show 4 left; use n for the unknown when ready.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention.

Science

2026-10-19 | Week 2 | Show what changed

Grade 3 | TEKS 3.7A, 3.7B

3.7A: Demonstrate and describe forces acting on an object in contact or at a distance, including magnetism, gravity, and pushes and pulls. In plain English: Show and explain pushes, pulls, gravity and magnetism, including forces that act without touching. 3.7B: Plan and conduct a descriptive investigation to demonstrate and explain how position and motion can be changed by pushing and pulling objects such as swings, balls, and wagons. In plain English: Plan and carry out a test showing how pushes and pulls change position or motion. Today: Show how a push or pull changes motion.

Grade 4 | TEKS 4.8A

4.8A: Investigate and identify the transfer of energy by objects in motion, waves in water, and sound. In plain English: Investigate how moving objects, water waves and sound transfer energy. Today: Observe energy moving from one object to another.

I Do

Grade 3: Use a toy car to model a push and pull; contact can change an object's motion. Grade 4: Roll one toy car into a stationary car. Predict, test and describe the movement of the second car as evidence of energy transfer.

We Do

Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same. Grade 3 chooses a push or pull to test, predicts the position change, marks the start, tries it and describes the observed result.

You Do

Grade 3: Show a push or pull that changes the car's position. Grade 4: Repeat with a fresh trial and identify where energy transferred.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Two toy cars, tape, flat board, counters, plates, cups, pencil or craft-stick set. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only.

Social studies

2026-10-19 | Week 2 | Show what changed

Grade 3 | TEKS 3.9A

3.9A: Identify characteristics of good citizenship, including truthfulness, justice, equality, respect for oneself and others, responsibility in daily life, and participation in government by educating oneself about the issues, respectfully holding public officials to their word, and voting. In plain English: Recognize responsible citizenship, including honesty, fairness, respect and participation in government. Today: Name a responsible action.

Grade 4 | TEKS 4.2A

4.2A: Summarize motivations for European exploration and settlement of Texas, including economic opportunity, competition, and the desire for expansion. In plain English: Explain why Europeans explored and settled Texas, including opportunity, competition and expansion. Today: Show why Europeans explored Texas.

I Do

Grade 3: Name a responsible action. Model with one district source, naming the visible clue. Grade 4: Show why Europeans explored Texas. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Work together with a second example from the same source set. G3 symbol photo; G4 explorer/route map. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Name a responsible action. Grade 4: Show why Europeans explored Texas. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources.
