Reading and writing

2026-12-14 | Week 9 | Show what you learned

Grade 3 | TEKS 3.8C

3.8C: Analyze plot elements, including the sequence of events, the conflict, and the resolution. In plain English: Explain the order of story events, the problem and how it is solved. Today: Identify the character's problem.

Grade 4 | TEKS 4.9D(i)

4.9D(i): Recognize characteristics and structures of informational text, including: the central idea with supporting evidence. In plain English: Identify an informational text's central idea and the details that support it. Today: Identify what the book is mostly about.

I Do

Read a short, accessible scene from Big Pumpkin. Show a visual sequence strip: beginning, middle, end. Ask the shared WH question, "Who is here, where are they, and what happens first?" Model pointing to a picture, choosing an answer card, using AAC or dictating a sentence. Then connect the same scene to each learner's target: Grade 3 identify the character's problem.; Grade 4 identify what the book is mostly about..

We Do

Reread the same scene aloud. Both learners use the same book, illustrations and three-part sequence mat. Ask who, what, where, when, why and how questions about the beginning, middle and end. Grade 3 arranges picture cards and answers with pointing, speech, AAC or dictation. Grade 4 explains the event, character action or evidence using the same page. Fade the model, switch teacher rotations, then revisit the visual sequence.

You Do

Use one fresh WH question about Big Pumpkin: "What happened at the beginning, middle or end, and how do you know?" Grade 3: Identify the character's problem. Grade 4: Identify what the book is mostly about. Record the page or illustration, response mode, prompt level and whether the student identified the story-structure element.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: The learner not with the teacher uses a previously taught three-picture sequence, WH picture sort, character/setting match or known Vizzle task from Big Pumpkin. When finished, the learner may complete the week's book craft or quiet enrichment. The teacher then switches and teaches the other learner from the same scene.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Real books: Big Pumpkin. Bring the props and response mats in the weekly book guide.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

After the shared read-aloud and comprehension sequence, each learner makes an individual response from the same book. Grade 3: Identify the character's problem. Grade 4: Identify what the book is mostly about. Offer large primary writing lines, a picture-to-sentence frame, tracing, dictation or AAC. Record composition separately from oral or picture evidence.

Visual WH and story-structure routine

Use the same book for both learners. Show who, what, where, when, why and how picture cards. Ask about the beginning, middle and end. Arrange three scene cards, then let each learner answer with pointing, AAC, speech, dictation or writing. Record the response mode and prompt level.

Craft or enrichment after comprehension

After comprehension, offer a simple book-connected craft: make a beginning-middle-end mini-book, build a character or setting collage, act out the problem and solution with props, or illustrate the favorite scene. Keep the visual sequence available and treat the craft as enrichment, not a replacement for the comprehension response.

Math

2026-12-14 | Week 9 | Show what you learned

Grade 3 | TEKS 3.3H

3.3H: Compare two fractions having the same numerator or denominator in problems by reasoning about their sizes and justifying the conclusion using symbols, words, objects, and pictorial models. In plain English: Compare fractions with the same numerator or denominator and justify which is greater. Today: Compare three fourths and one fourth; show which is larger and why.

Grade 4 | TEKS 4.3A, 4.3B, 4.3E

4.3A: Represent a fraction a/b as a sum of fractions 1/b, where a and b are whole numbers and b > 0, including when a > b. In plain English: Build fractions, including amounts greater than one, by adding unit fractions. 4.3B: Decompose a fraction in more than one way into a sum of fractions with the same denominator using concrete and pictorial models and recording results with symbolic representations. In plain English: Break a fraction into same-denominator sums in more than one way; show models and equations. 4.3E: Represent and solve addition and subtraction of fractions with equal denominators using objects and pictorial models that build to the number line and properties of operations. In plain English: Model and solve fraction addition and subtraction with equal denominators. Today: Build a fresh like-denominator sum or difference; name one and one half from the model.

I Do

Grade 3: Use equal-length wholes to compare one half and one fourth. Point to the larger amount. Grade 4: Join one fourth and two fourths to make three fourths. Remove one fourth from three fourths. Build one whole plus one half.

We Do

Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations. Grade 4: build 3/4 as 1/4 + 1/4 + 1/4 and again as 1/4 + 2/4. Record both equations and explain why the same whole and denominator stay fixed.

You Do

Grade 3: Compare three fourths and one fourth; show which is larger and why. Grade 4: Build a fresh like-denominator sum or difference; name one and one half from the model.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention.

Science

2026-12-14 | Week 9 | Show what you learned

Grade 3 | TEKS 3.8A, 3.8B

3.8A: Identify everyday examples of energy, including light, sound, thermal, and mechanical. In plain English: Recognize everyday examples of light, sound, thermal and mechanical energy. 3.8B: Plan and conduct investigations that demonstrate how the speed of an object is related to its mechanical energy. In plain English: Plan and carry out a test connecting an object's speed to its mechanical energy. Today: Compare slow and faster runs of the same car; use the effect on a foam block to explain the relationship between speed and mechanical energy.

Grade 4 | TEKS 4.7, 4.8A

4.7: Plan and conduct descriptive investigations to explore the patterns of forces such as gravity, friction, or magnetism in contact or at a distance on an object. In plain English: Plan and conduct investigations to find patterns in gravity, friction or magnetism. 4.8A: Investigate and identify the transfer of energy by objects in motion, waves in water, and sound. In plain English: Investigate how moving objects, water waves and sound transfer energy. Today: Use a tested model to explain a force or energy transfer.

I Do

Grade 3: Choose a familiar motion investigation and make a model or photo display. Grade 4: Build a model of an investigated force or energy transfer.

We Do

Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same. Grade 3: plan two releases of the same car, one slow and one faster, into the same lightweight foam block. Keep the car, block, surface and collision point fixed; reset the block and repeat three trials per condition. Record observed speed and how far the block moves. Use the greater observed effect as evidence about mechanical energy; do not use travel distance alone as a speed measurement.

You Do

Grade 3: Demonstrate the tested change and communicate one observation. Grade 4: Demonstrate the change and communicate evidence for the explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Balance, rock, cotton ball, measuring cup, two containers, tray, fraction strips, project photos. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only.

Social studies

2026-12-14 | Week 9 | Show what you learned

Grade 3 | TEKS 3.1A

3.1A: Describe how individuals, events, and ideas have changed communities, past and present. In plain English: Explain how people, events and ideas have changed communities. Today: Identify a community change caused by people.

Grade 4 | TEKS 4.3C

4.3C: Identify leaders important to the founding of Texas as a republic and state, including José Antonio Navarro, Sam Houston, Mirabeau Lamar, and Anson Jones. In plain English: Identify leaders who helped establish Texas as a republic and a state. Today: Identify a leader of the Republic of Texas.

I Do

Grade 3: Identify a community change caused by people. Model with one district source, naming the visible clue. Grade 4: Identify a leader of the Republic of Texas. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Work together with a second example from the same source set. Student chooses from previously learned cards, not a brand-new topic. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Identify a community change caused by people. Grade 4: Identify a leader of the Republic of Texas. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources.
