Reading and writing

2026-12-15 | Week 9 | Show what you learned

Grade 3 | TEKS 3.8B

3.8B: Explain the relationships among the major and minor characters. In plain English: Explain how the main and supporting characters are connected. Today: Show how one character responds to another.

Grade 4 | TEKS 4.6G

4.6G: Evaluate details read to determine key ideas. In plain English: Decide which details matter and use them to work out the text's key ideas. Today: Choose important details about the artist and use them to explain a key idea.

I Do

Open the actual book to a prepared scene. State each grade's target above. Reread one familiar scene from the real book and model matching a character or action to the illustration. Point to the exact illustration or sentence that makes the answer reasonable.

We Do

Act the scene with props; connect the action to the book picture. Return to the real page after acting. Ask the learner to show the book evidence, not just remember the prop. For TEKS 4.6G, compare two relevant details with one unrelated detail. Ask which details belong together and what idea they teach; return to the text to check.

You Do

Grade 3: Show how one character responds to another. Grade 4: Choose important details about the artist and use them to explain a key idea. Ask a fresh question about a familiar bookmarked page. Accept the planned response mode and save the page/scene with the response.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match familiar props or photos from the already taught scene, sequence two mastered event photos, or use a known Vizzle task. Independent reading is not assumed.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Real books: Big Pumpkin. Bring the props and response mats in the weekly book guide.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

After the read-aloud, build one sentence from the evidence: Grade 3 states an opinion about helping and gives a reason; Grade 4 writes or dictates an informational fact about the artist. Keep HMH phonics/spelling at the assessed pattern; teach three words before Friday's spelling check. Writing TEKS 3.7B / 4.7B: compose a response to the actual text. Dictation or AAC composition is an access option; record the response method. Matching a picture alone is reading evidence, not independent written composition. For Grade 4, add an alike/different sentence comparing an idea in today's book with a previously read book; point to evidence in both sources.

Math

2026-12-15 | Week 9 | Show what you learned

Grade 3 | TEKS 3.7D, 3.7E

3.7D: Determine when it is appropriate to use measurements of liquid volume (capacity) or weight. In plain English: Decide whether a situation calls for measuring weight or liquid capacity. 3.7E: Determine liquid volume (capacity) or weight using appropriate units and tools. In plain English: Measure weight or liquid capacity with the right tool and units. Today: Choose the correct tool, measure a new object or amount of water, and record the number with its unit.

Grade 4 | TEKS 4.3A, 4.3B, 4.3E

4.3A: Represent a fraction a/b as a sum of fractions 1/b, where a and b are whole numbers and b > 0, including when a > b. In plain English: Build fractions, including amounts greater than one, by adding unit fractions. 4.3B: Decompose a fraction in more than one way into a sum of fractions with the same denominator using concrete and pictorial models and recording results with symbolic representations. In plain English: Break a fraction into same-denominator sums in more than one way; show models and equations. 4.3E: Represent and solve addition and subtraction of fractions with equal denominators using objects and pictorial models that build to the number line and properties of operations. In plain English: Model and solve fraction addition and subtraction with equal denominators. Today: Build a fresh like-denominator sum or difference; name one and one half from the model.

I Do

Grade 3: Choose a balance with gram weights to measure a classroom object, or a marked measuring cup to measure water in milliliters. Name the tool, number and unit. Grade 4: Join one fourth and two fourths to make three fourths. Remove one fourth from three fourths. Build one whole plus one half.

We Do

Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations. Grade 4: build 3/4 as 1/4 + 1/4 + 1/4 and again as 1/4 + 2/4. Record both equations and explain why the same whole and denominator stay fixed.

You Do

Grade 3: Choose the correct tool, measure a new object or amount of water, and record the number with its unit. Grade 4: Build a fresh like-denominator sum or difference; name one and one half from the model.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention.

Science

2026-12-15 | Week 9 | Show what you learned

Grade 3 | TEKS 3.8A, 3.8B

3.8A: Identify everyday examples of energy, including light, sound, thermal, and mechanical. In plain English: Recognize everyday examples of light, sound, thermal and mechanical energy. 3.8B: Plan and conduct investigations that demonstrate how the speed of an object is related to its mechanical energy. In plain English: Plan and carry out a test connecting an object's speed to its mechanical energy. Today: Compare slow and faster runs of the same car; use the effect on a foam block to explain the relationship between speed and mechanical energy.

Grade 4 | TEKS 4.7, 4.8A

4.7: Plan and conduct descriptive investigations to explore the patterns of forces such as gravity, friction, or magnetism in contact or at a distance on an object. In plain English: Plan and conduct investigations to find patterns in gravity, friction or magnetism. 4.8A: Investigate and identify the transfer of energy by objects in motion, waves in water, and sound. In plain English: Investigate how moving objects, water waves and sound transfer energy. Today: Use a tested model to explain a force or energy transfer.

I Do

Grade 3: Choose a familiar motion investigation and make a model or photo display. Grade 4: Build a model of an investigated force or energy transfer.

We Do

Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same. Grade 3: plan two releases of the same car, one slow and one faster, into the same lightweight foam block. Keep the car, block, surface and collision point fixed; reset the block and repeat three trials per condition. Record observed speed and how far the block moves. Use the greater observed effect as evidence about mechanical energy; do not use travel distance alone as a speed measurement.

You Do

Grade 3: Demonstrate the tested change and communicate one observation. Grade 4: Demonstrate the change and communicate evidence for the explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Balance, rock, cotton ball, measuring cup, two containers, tray, fraction strips, project photos. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only.

Social studies

2026-12-15 | Week 9 | Show what you learned

Grade 3 | TEKS 3.9C

3.9C: Identify and describe individual acts of civic responsibility, including obeying laws, serving and improving the community, serving on a jury, and voting. In plain English: Describe civic responsibilities such as following laws, helping the community, jury service and voting. Today: Explain an action that improves a community.

Grade 4 | TEKS 4.3D

4.3D: Describe the successes, problems, and organizations of the Republic of Texas such as the establishment of a constitution, economic struggles, relations with American Indians, and the Texas Rangers. In plain English: Describe the Republic of Texas's successes, problems and organizations. Today: Explain a challenge faced by the Republic.

I Do

Grade 3: Explain an action that improves a community. Model with one district source, naming the visible clue. Grade 4: Explain a challenge faced by the Republic. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Work together with a second example from the same source set. Problem/action/result or event/person/result. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Explain an action that improves a community. Grade 4: Explain a challenge faced by the Republic. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources.
