Reading and writing

2026-10-13 | Week 1 | People solve problems

Grade 3 | TEKS 3.8C, 3.7D

3.8C: Analyze plot elements, including the sequence of events, the conflict, and the resolution. In plain English: Explain the order of story events, the problem and how it is solved. 3.7D: Retell and paraphrase texts in ways that maintain meaning and logical order. In plain English: Retell or put a text into your own words while keeping its meaning and order. Today: Answer who and where questions; identify the first event with a picture or page clue.

Grade 4 | TEKS 4.8C, 4.7C

4.8C: Analyze plot elements, including the rising action, climax, falling action, and resolution. In plain English: Explain how a story builds to its turning point and moves toward a solution. 4.7C: Use text evidence to support an appropriate response. In plain English: Support an answer with something the text actually says or shows. Today: Find the story problem and explain a character's first action with an illustration.

I Do

Read a short scene from Room on the Broom. Think aloud: "Who is here? What happened? Is this at the beginning, middle or end?" Place one simple picture marker on the matching part of the sequence mat. Return to the real page to show the clue.

We Do

Reread the same scene together. Offer two clear picture choices for who/what/where; then place the scene in beginning, middle or end. Ask the Grade 4 learner how the character's action changes what happens next. Both learners use this same page and story.

You Do

Use a different scene from Room on the Broom. Grade 3 answers one who/what/where prompt and sequences the event. Grade 4 explains one character action and its effect, using a page or illustration clue. Record the exact prompt, response mode and support.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Use a familiar three-picture sequence from Room on the Broom: place, point to or tell what happened first, next and last. Keep a finished basket and an already-taught follow-up task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Record the question asked, the response, whether the event was placed in beginning/middle/end, the page or illustration used, and any extra prompt. This is classroom evidence; compare with an IEP goal only after the actual goal is provided.

Materials

Real books: Room on the Broom. Bring the props and response mats in the weekly book guide.

Book connection for this subject

Room on the Broom | Notice the problem, the helper's action, and what changes next.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

Respond about Room on the Broom: draw or select one important scene, then complete a large-print frame: "First ____. Next ____. Last ____." Offer dictation, AAC, pointing or primary writing lines.

Visual WH and story-structure routine

Use the same book for both learners. Show who, what, where, when, why and how picture cards. Ask about the beginning, middle and end. Arrange three scene cards, then let each learner answer with pointing, AAC, speech, dictation or writing. Record the response mode and prompt level.

Craft or enrichment after comprehension

Make a helper collage or build a paper broom with labeled passengers. Offer it after the comprehension response or as an early-finisher activity; keep the WH pictures and sequence strip available.

8-9 AM read-aloud

Room on the Broom by Julia Donaldson. Return to the real pages for evidence; see the weekly book guide.

Math

2026-10-13 | Week 1 | People solve problems

Grade 3 | TEKS 3.4D, 3.4E

3.4D: Determine the total number of objects when equally-sized groups of objects are combined or arranged in arrays up to 10 by 10. In plain English: Find the total in equal groups or arrays up to 10 by 10. 3.4E: Represent multiplication facts by using a variety of approaches such as repeated addition, equal-sized groups, arrays, area models, equal jumps on a number line, and skip counting. In plain English: Show multiplication using groups, arrays, repeated addition, jumps or skip counting. Today: Build another equal-group model and state or select the matching fact.

Grade 4 | TEKS 4.4E, 4.4F

4.4E: Represent the quotient of up to a four-digit whole number divided by a one-digit whole number using arrays, area models, or equations. In plain English: Model division of up to a four-digit number by a one-digit number. 4.4F: Use strategies and algorithms, including the standard algorithm, to divide up to a four-digit dividend by a one-digit divisor. In plain English: Use division strategies and the standard algorithm with up to four-digit dividends and one-digit divisors. Today: Build a fresh equal-sharing example and identify the quotient.

I Do

Use Room on the Broom as today's context. Count and share "broom supplies" into equal groups; name the total or amount in each group. Use Room on the Broom as today's context. Count and share "broom supplies" into equal groups; name the total or amount in each group. Use Room on the Broom as today's context. Count and share "broom supplies" into equal groups; name the total or amount in each group. Use Room on the Broom as today's context. Count and share "broom supplies" into equal groups; name the total or amount in each group. Use Room on the Broom as today's context. Count and share "broom supplies" into equal groups; name the total or amount in each group. Use Room on the Broom as today's context. Count and share "broom supplies" into equal groups; name the total or amount in each group. Use Room on the Broom as today's context. Count and share "broom supplies" into equal groups; name the total or amount in each group. Grade 3: Make 2 groups of 3 counters; connect equal groups to 2 x 3 = 6. Grade 4: Share 12 counters among 3 cups; connect 4 in each cup to 12 / 3 = 4.

We Do

Return to Room on the Broom and use its pictures, props or vocabulary as the context. Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations. Grade 4: connect 12 / 3 to the written division algorithm: divide 12 ones into 3 groups, write 4, multiply 4 x 3, subtract 12, and show remainder 0. Extend with place-value blocks to 132 / 3 = 44 when ready; preserve the same place-value steps.

You Do

Grade 3: Build another equal-group model and state or select the matching fact. Grade 4: Build a fresh equal-sharing example and identify the quotient.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention. Add a visual or prop from Room on the Broom that represents this connection.

Book connection for this subject

Room on the Broom | Count and share "broom supplies" into equal groups; name the total or amount in each group.

Science

2026-10-13 | Week 1 | People solve problems

Grade 3 | TEKS 3.7A, 3.7B

3.7A: Demonstrate and describe forces acting on an object in contact or at a distance, including magnetism, gravity, and pushes and pulls. In plain English: Show and explain pushes, pulls, gravity and magnetism, including forces that act without touching. 3.7B: Plan and conduct a descriptive investigation to demonstrate and explain how position and motion can be changed by pushing and pulling objects such as swings, balls, and wagons. In plain English: Plan and carry out a test showing how pushes and pulls change position or motion. Today: Show how a push or pull changes motion.

Grade 4 | TEKS 4.6B, 4.6C

4.6B: Investigate and compare a variety of mixtures, including solutions that are composed of liquids in liquids and solids in liquids. In plain English: Investigate and compare mixtures, including liquids mixed with liquids and solids with liquids. 4.6C: Demonstrate that matter is conserved when mixtures such as soil and water or oil and water are formed. In plain English: Show that matter is still present when materials are combined into a mixture. Today: Compare a mixture and a solution; use before/after mass readings of the same closed container to show that matter is conserved.

I Do

Use Room on the Broom as today's context. Use broom, wagon and character props to test a push or pull and describe the change in motion. Use Room on the Broom as today's context. Use broom, wagon and character props to test a push or pull and describe the change in motion. Use Room on the Broom as today's context. Use broom, wagon and character props to test a push or pull and describe the change in motion. Use Room on the Broom as today's context. Use broom, wagon and character props to test a push or pull and describe the change in motion. Use Room on the Broom as today's context. Use broom, wagon and character props to test a push or pull and describe the change in motion. Use Room on the Broom as today's context. Use broom, wagon and character props to test a push or pull and describe the change in motion. Use Room on the Broom as today's context. Use broom, wagon and character props to test a push or pull and describe the change in motion. Grade 3: Use a toy car to model a push and pull; contact can change an object's motion. Grade 4: Mix dry beans with large pasta, then separate them. Mix sugar into water and observe that it is still present even when not visible. For conservation, weigh a lidded clear container holding separate soil and water before mixing. Mix without opening or spilling, then weigh the same closed system again. Compare readings; the materials remain even though their arrangement changes.

We Do

Return to Room on the Broom and use its pictures, props or vocabulary as the context. Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same. Grade 4 repeats the closed-container before/after weighing and records both readings. Compare a soil-water mixture with a sugar-water solution and a liquid-liquid mixture such as oil and water. Do not taste the materials. Grade 3 chooses a push or pull to test, predicts the position change, marks the start, tries it and describes the observed result.

You Do

Grade 3: Show a push or pull that changes the car's position. Grade 4: Identify a separable mixture and describe the sugar-water observation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, 3 plates, toy car, tray, dry beans, large pasta, clear cup, sugar, spoon. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only. Add a visual or prop from Room on the Broom that represents this connection.

Book connection for this subject

Room on the Broom | Use broom, wagon and character props to test a push or pull and describe the change in motion.

Social studies

2026-10-13 | Week 1 | People solve problems

Grade 3 | TEKS 3.9C

3.9C: Identify and describe individual acts of civic responsibility, including obeying laws, serving and improving the community, serving on a jury, and voting. In plain English: Describe civic responsibilities such as following laws, helping the community, jury service and voting. Today: Explain how a helpful action serves the community.

Grade 4 | TEKS 4.2B

4.2B: Identify the accomplishments and explain the impact of significant explorers, including Cabeza de Vaca; Francisco Coronado; and René Robert Cavelier, Sieur de la Salle, on the settlement of Texas. In plain English: Explain named explorers' accomplishments and their effects on Texas settlement. Today: Connect a named explorer to an accomplishment.

I Do

Use Room on the Broom as today's context. Name how each helper contributes and connect the story to responsible classroom citizenship. Use Room on the Broom as today's context. Name how each helper contributes and connect the story to responsible classroom citizenship. Use Room on the Broom as today's context. Name how each helper contributes and connect the story to responsible classroom citizenship. Use Room on the Broom as today's context. Name how each helper contributes and connect the story to responsible classroom citizenship. Use Room on the Broom as today's context. Name how each helper contributes and connect the story to responsible classroom citizenship. Use Room on the Broom as today's context. Name how each helper contributes and connect the story to responsible classroom citizenship. Use Room on the Broom as today's context. Name how each helper contributes and connect the story to responsible classroom citizenship. Grade 3: Explain how a helpful action serves the community. Model with one district source, naming the visible clue. Grade 4: Connect a named explorer to an accomplishment. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Return to Room on the Broom and use its pictures, props or vocabulary as the context. Work together with a second example from the same source set. Use large photo cards and a floor map; identify one symbol (G3) or one explorer/route (G4). Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Explain how a helpful action serves the community. Grade 4: Connect a named explorer to an accomplishment. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources. Add a visual or prop from Room on the Broom that represents this connection.

Book connection for this subject

Room on the Broom | Name how each helper contributes and connect the story to responsible classroom citizenship.
