Week 3 | Friday checks

2026-10-30 | Three brief items per check. Record accuracy and support separately.

Spelling

Use three words explicitly taught from each learner's current HMH sound-spelling pattern. Say the word, use it in a sentence, repeat it. Record encoding separately from supported pattern recognition. Words: _____ _____ _____.

Grade 3 reading | Pumpkin Soup

Use the actual book, with the planned access supports.

1. Who is here, where are they, and what happens first?

Teacher key: Names or points to the character, setting or event.

2. What does a character do about the problem?

Teacher key: Shows a character action in the selected scene.

3. What happens next or at the end?

Teacher key: Sequences the next or ending event from the book.

Grade 4 reading | Pumpkin Soup

Use the actual book, with the planned access supports.

1. What problem or important event is shown in this scene?

Teacher key: Identifies a problem or important event actually shown.

2. What does a character do, and why?

Teacher key: Explains a character action or choice with support.

3. How does that action affect the result? Show the page or illustration.

Teacher key: Connects the action to the result using page evidence.

Math | Week 3

Grade 3

3.5E

1. Build a table for 1, 2 and 3 bags with 2 counters in each bag.

2. Show how many counters are needed for 4 bags.

3. Explain or select the relationship between bags and counters.

Teacher key

1/2, 2/4, 3/6; 8 counters; two counters for each bag.

Grade 4

4.5C | 4.5D

1. Cover a 2-by-3 rectangle with square tiles and explain 2 x 3.

2. Trace all four sides and explain 2 + 3 + 2 + 3.

3. For a 2-by-4 rectangle, find area and perimeter with a model.

Teacher key

6 square units; 10 units; area 8 square units and perimeter 12 units. Accept supported models; record help.

Science | Week 3

Grade 3

3.8A

1. Identify light from a flashlight.

2. Identify sound from a shaker.

3. Show mechanical energy by moving a car.

Teacher key

Light; sound; moving object

Grade 4

4.8A | 4.8B | 4.8C

1. Close a battery circuit with an LED or bulb.

2. Open the circuit and show what happens.

3. Identify that electrical energy follows a closed path when the bulb lights.

Teacher key

Bulb lights; bulb stops lighting; closed path identified

Additional product: Writing

Writing: one clear idea, relevant detail/reason and understandable communication. Social studies: a correct person/event or community claim, relevant source evidence and supported connection. Score each criterion 0/1 with prompts noted; apply school grading rules.
