Reading and writing

2026-11-11 | Week 5 | Small actions help

Grade 3 | TEKS 3.9D(i)

3.9D(i): Recognize characteristics and structures of informational text, including: the central idea with supporting evidence. In plain English: Identify an informational text's central idea and the details that support it. Today: Retell the beginning, middle and end with three visual event cards.

Grade 4 | TEKS 4.9D(i), 4.7C

4.9D(i): Recognize characteristics and structures of informational text, including: the central idea with supporting evidence. In plain English: Identify an informational text's central idea and the details that support it. 4.7C: Use text evidence to support an appropriate response. In plain English: Support an answer with something the text actually says or shows. Today: Explain the beginning, middle and end, including how a character responds.

I Do

Read a short scene from We're Going on a Leaf Hunt. Think aloud: "Who is here? What happened? Is this at the beginning, middle or end?" Place one simple picture marker on the matching part of the sequence mat. Return to the real page to show the clue.

We Do

Reread the same scene together. Offer two clear picture choices for who/what/where; then place the scene in beginning, middle or end. Ask the Grade 4 learner how the character's action changes what happens next. Both learners use this same page and story.

You Do

Use a different scene from We're Going on a Leaf Hunt. Grade 3 answers one who/what/where prompt and sequences the event. Grade 4 explains one character action and its effect, using a page or illustration clue. Record the exact prompt, response mode and support.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Use a familiar three-picture sequence from We're Going on a Leaf Hunt: place, point to or tell what happened first, next and last. Keep a finished basket and an already-taught follow-up task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Record the question asked, the response, whether the event was placed in beginning/middle/end, the page or illustration used, and any extra prompt. This is classroom evidence; compare with an IEP goal only after the actual goal is provided.

Materials

Real books: We're Going on a Leaf Hunt. Bring the props and response mats in the weekly book guide.

Book connection for this subject

We're Going on a Leaf Hunt | Sequence the friends' route, notice the leaves they find, and retell how the hunt ends.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

Respond about We're Going on a Leaf Hunt: draw or select one important scene, then complete a large-print frame: "First ____. Next ____. Last ____." Offer dictation, AAC, pointing or primary writing lines.

Visual WH and story-structure routine

Use the same book for both learners. Show who, what, where, when, why and how picture cards. Ask about the beginning, middle and end. Arrange three scene cards, then let each learner answer with pointing, AAC, speech, dictation or writing. Record the response mode and prompt level.

Craft or enrichment after comprehension

Make a large-print route accordion with one leaf picture and location on each panel. Offer it after the comprehension response or as an early-finisher activity; keep the WH pictures and sequence strip available.

8-9 AM read-aloud

We're Going on a Leaf Hunt by Steve Metzger. Return to the real pages for evidence; see the weekly book guide.

Math

2026-11-11 | Week 5 | Small actions help

Grade 3 | TEKS 3.3A, 3.3C

3.3A: Represent fractions greater than zero and less than or equal to one with denominators of 2, 3, 4, 6, and 8 using concrete objects and pictorial models, including strip diagrams and number lines. In plain English: Model fractions from greater than zero through one, using halves, thirds, fourths, sixths and eighths. 3.3C: Explain that the unit fraction 1/b represents the quantity formed by one part of a whole that has been partitioned into b equal parts where b is a non-zero whole number. In plain English: Explain that a unit fraction is one equal part of a whole. Today: Select 3 of the 4 equal parts and show three fourths.

Grade 4 | TEKS 4.5B

4.5B: Represent problems using an input-output table and numerical expressions to generate a number pattern that follows a given rule representing the relationship of the values in the resulting sequence and their position in the sequence. In plain English: Use a rule, an input-output table and expressions to represent a number pattern. Today: Continue 2, 4, 6; then find output 7 for input 5 under add 2.

I Do

Use We're Going on a Leaf Hunt as today's context. Sort and count the leaves collected on the story route; use the groups to model this week's fraction target. Use We're Going on a Leaf Hunt as today's context. Sort and count the leaves collected on the story route; use the groups to model this week's fraction target. Use We're Going on a Leaf Hunt as today's context. Sort and count the leaves collected on the story route; use the groups to model this week's fraction target. Use We're Going on a Leaf Hunt as today's context. Sort and count the leaves collected on the story route; use the groups to model this week's fraction target. Use We're Going on a Leaf Hunt as today's context. Sort and count the leaves collected on the story route; use the groups to model this week's fraction target. Use We're Going on a Leaf Hunt as today's context. Sort and count the leaves collected on the story route; use the groups to model this week's fraction target. Use We're Going on a Leaf Hunt as today's context. Sort and count the leaves collected on the story route; use the groups to model this week's fraction target. Grade 3: Fold an equal-size paper whole into 4 equal parts; select one part and name one fourth. Grade 4: Build 2, 4, 6 counters. Say the rule is add 2. Use an input-output mat to show input 3 gives output 5 under add 2.

We Do

Return to We're Going on a Leaf Hunt and use its pictures, props or vocabulary as the context. Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations.

You Do

Grade 3: Select 3 of the 4 equal parts and show three fourths. Grade 4: Continue 2, 4, 6; then find output 7 for input 5 under add 2.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention. Add a visual or prop from We're Going on a Leaf Hunt that represents this connection.

Book connection for this subject

We're Going on a Leaf Hunt | Sort and count the leaves collected on the story route; use the groups to model this week's fraction target.

Science

2026-11-11 | Week 5 | Small actions help

Grade 3 | TEKS 3.8A

3.8A: Identify everyday examples of energy, including light, sound, thermal, and mechanical. In plain English: Recognize everyday examples of light, sound, thermal and mechanical energy. Today: Identify light, sound, thermal and mechanical energy.

Grade 4 | TEKS 4.8A, 4.8B, 4.8C

4.8A: Investigate and identify the transfer of energy by objects in motion, waves in water, and sound. In plain English: Investigate how moving objects, water waves and sound transfer energy. 4.8B: Identify conductors and insulators of thermal and electrical energy. In plain English: Identify materials that let heat or electricity pass through and materials that resist it. 4.8C: Demonstrate and describe how electrical energy travels in a closed path that can produce light and thermal energy. In plain English: Show that electricity travels around a closed path and can produce light and heat. Today: Observe energy transfer, test materials and build a closed circuit.

I Do

Use We're Going on a Leaf Hunt as today's context. Compare leaf colors, shapes and textures; record observations without claiming every local tree changes the same way. Use We're Going on a Leaf Hunt as today's context. Compare leaf colors, shapes and textures; record observations without claiming every local tree changes the same way. Use We're Going on a Leaf Hunt as today's context. Compare leaf colors, shapes and textures; record observations without claiming every local tree changes the same way. Use We're Going on a Leaf Hunt as today's context. Compare leaf colors, shapes and textures; record observations without claiming every local tree changes the same way. Use We're Going on a Leaf Hunt as today's context. Compare leaf colors, shapes and textures; record observations without claiming every local tree changes the same way. Use We're Going on a Leaf Hunt as today's context. Compare leaf colors, shapes and textures; record observations without claiming every local tree changes the same way. Use We're Going on a Leaf Hunt as today's context. Compare leaf colors, shapes and textures; record observations without claiming every local tree changes the same way. Grade 3: Show a flashlight, shaker, safely lukewarm sealed bottle and moving car. Name light, sound, thermal and mechanical energy. Grade 4: Use moving cars, sound, thermal conductors and a low-voltage battery circuit to observe transfer. Close the path to light a bulb; open it to stop.

We Do

Return to We're Going on a Leaf Hunt and use its pictures, props or vocabulary as the context. Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same.

You Do

Grade 3: Match an object to its energy form; demonstrate one observable change. Grade 4: Show a transfer or closed circuit and identify what changed.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Fraction pieces, counters, puppets, flashlight, sealed lukewarm bottle, magnet, paper clips, felt, board. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only. Add a visual or prop from We're Going on a Leaf Hunt that represents this connection.

Book connection for this subject

We're Going on a Leaf Hunt | Compare leaf colors, shapes and textures; record observations without claiming every local tree changes the same way.

Social studies

2026-11-11 | Week 5 | Small actions help

Grade 3 | TEKS 3.14B

3.14B: Differentiate and compare the information about a specific issue or event provided in primary and secondary sources. In plain English: Compare what firsthand sources and later accounts say about the same issue or event. Today: Tell what both sources agree on.

Grade 4 | TEKS 4.3B

4.3B: Summarize the significant contributions of individuals such as William B. Travis, James Bowie, David Crockett, Juan N. Seguín, Plácido Benavides, José Francisco Ruiz, Antonio López de Santa Anna, Susanna Dickinson, and Enrique Esparza. In plain English: Explain how important individuals contributed to the Texas Revolution. Today: Explain one person's contribution to the Revolution.

I Do

Use We're Going on a Leaf Hunt as today's context. Use a simple route map to connect the friends' journey with safe ways people explore and care for local places. Use We're Going on a Leaf Hunt as today's context. Use a simple route map to connect the friends' journey with safe ways people explore and care for local places. Use We're Going on a Leaf Hunt as today's context. Use a simple route map to connect the friends' journey with safe ways people explore and care for local places. Use We're Going on a Leaf Hunt as today's context. Use a simple route map to connect the friends' journey with safe ways people explore and care for local places. Use We're Going on a Leaf Hunt as today's context. Use a simple route map to connect the friends' journey with safe ways people explore and care for local places. Use We're Going on a Leaf Hunt as today's context. Use a simple route map to connect the friends' journey with safe ways people explore and care for local places. Use We're Going on a Leaf Hunt as today's context. Use a simple route map to connect the friends' journey with safe ways people explore and care for local places. Grade 3: Tell what both sources agree on. Model with one district source, naming the visible clue. Grade 4: Explain one person's contribution to the Revolution. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Return to We're Going on a Leaf Hunt and use its pictures, props or vocabulary as the context. Work together with a second example from the same source set. Use floor timeline and large cards. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Tell what both sources agree on. Grade 4: Explain one person's contribution to the Revolution. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources. Add a visual or prop from We're Going on a Leaf Hunt that represents this connection.

Book connection for this subject

We're Going on a Leaf Hunt | Use a simple route map to connect the friends' journey with safe ways people explore and care for local places.
