Reading and writing

2026-10-27 | Week 3 | Characters take action

Grade 3 | TEKS 3.8C, 3.7D

3.8C: Analyze plot elements, including the sequence of events, the conflict, and the resolution. In plain English: Explain the order of story events, the problem and how it is solved. 3.7D: Retell and paraphrase texts in ways that maintain meaning and logical order. In plain English: Retell or put a text into your own words while keeping its meaning and order. Today: Retell the important events in order using three picture cards.

Grade 4 | TEKS 4.8C, 4.7C

4.8C: Analyze plot elements, including the rising action, climax, falling action, and resolution. In plain English: Explain how a story builds to its turning point and moves toward a solution. 4.7C: Use text evidence to support an appropriate response. In plain English: Support an answer with something the text actually says or shows. Today: Analyze the sequence of events and identify the turning point.

I Do

Book connection: Identify the characters' jobs, the conflict about changing roles, and the repaired plan. Read a short, accessible scene from Pumpkin Soup. Show a visual sequence strip: beginning, middle, end. Ask the shared WH question, "Who is here, where are they, and what happens first?" Model pointing to a picture, choosing an answer card, using AAC or dictating a sentence. Then connect the same scene to each learner's target: Grade 3 retell the important events in order using three picture cards.; Grade 4 analyze the sequence of events and identify the turning point..

We Do

Return to Pumpkin Soup and use its pictures, props or vocabulary as the context. Reread the same scene aloud. Both learners use the same book, illustrations and three-part sequence mat. Ask who, what, where, when, why and how questions about the beginning, middle and end. Grade 3 arranges picture cards and answers with pointing, speech, AAC or dictation. Grade 4 explains the event, character action or evidence using the same page. Fade the model, switch teacher rotations, then revisit the visual sequence.

You Do

Use one fresh WH question about Pumpkin Soup: "What happened at the beginning, middle or end, and how do you know?" Grade 3: Retell the important events in order using three picture cards. Grade 4: Analyze the sequence of events and identify the turning point. Record the page or illustration, response mode, prompt level and whether the student identified the story-structure element.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: The learner not with the teacher uses a previously taught three-picture sequence, WH picture sort, character/setting match or known Vizzle task from Pumpkin Soup. When finished, the learner may complete the week's book craft or quiet enrichment. The teacher then switches and teaches the other learner from the same scene.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Real books: Pumpkin Soup. Bring the props and response mats in the weekly book guide.

Book connection for this subject

Pumpkin Soup | Identify the characters' jobs, the conflict about changing roles, and the repaired plan.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

After the shared read-aloud and comprehension sequence, each learner makes an individual response from the same book. Grade 3: Retell the important events in order using three picture cards. Grade 4: Analyze the sequence of events and identify the turning point. Offer large primary writing lines, a picture-to-sentence frame, tracing, dictation or AAC. Record composition separately from oral or picture evidence.

Visual WH and story-structure routine

Use the same book for both learners. Show who, what, where, when, why and how picture cards. Ask about the beginning, middle and end. Arrange three scene cards, then let each learner answer with pointing, AAC, speech, dictation or writing. Record the response mode and prompt level.

Craft or enrichment after comprehension

Make a paper soup bowl with picture ingredients and a three-part problem/solution strip.

8-9 AM read-aloud

Pumpkin Soup by Helen Cooper. Return to the real pages for evidence; see the weekly book guide.

Math

2026-10-27 | Week 3 | Characters take action

Grade 3 | TEKS 3.4H, 3.4J

3.4H: Determine the number of objects in each group when a set of objects is partitioned into equal shares or a set of objects is shared equally. In plain English: Find how many objects are in each group after sharing equally. 3.4J: Determine a quotient using the relationship between multiplication and division. In plain English: Use a related multiplication fact to solve a division problem. Today: Share 6 counters between 2 plates, then show how many are in each group.

Grade 4 | TEKS 4.5A

4.5A: Represent multi-step problems involving the four operations with whole numbers using strip diagrams and equations with a letter standing for the unknown quantity. In plain English: Represent multi-step problems using the four operations, diagrams and equations with a letter for the unknown. Today: Model 3 bags of 2 pencils, then give away 2. Choose operations and show 4 left; use n for the unknown when ready.

I Do

Book connection: Use pretend soup ingredients to make equal groups or a simple input-output table for servings. Grade 3: Share 8 counters between 2 plates; each plate receives 4. Connect the model to 8 / 2 = 4. Grade 4: Act out 2 bags with 3 pencils each, then give away 1 pencil. Build a strip diagram; connect it to (2 x 3) - 1 = n. Find 5 pencils left. Begin with one step if needed.

We Do

Return to Pumpkin Soup and use its pictures, props or vocabulary as the context. Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations. Grade 3: after sharing 8 into 2 equal groups, use 2 x 4 = 8 to explain why 8 / 2 = 4.

You Do

Grade 3: Share 6 counters between 2 plates, then show how many are in each group. Grade 4: Model 3 bags of 2 pencils, then give away 2. Choose operations and show 4 left; use n for the unknown when ready.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention. Add a visual or prop from Pumpkin Soup that represents this connection.

Book connection for this subject

Pumpkin Soup | Use pretend soup ingredients to make equal groups or a simple input-output table for servings.

Science

2026-10-27 | Week 3 | Characters take action

Grade 3 | TEKS 3.8A

3.8A: Identify everyday examples of energy, including light, sound, thermal, and mechanical. In plain English: Recognize everyday examples of light, sound, thermal and mechanical energy. Today: Identify light, sound, thermal and mechanical energy.

Grade 4 | TEKS 4.8A, 4.8B, 4.8C

4.8A: Investigate and identify the transfer of energy by objects in motion, waves in water, and sound. In plain English: Investigate how moving objects, water waves and sound transfer energy. 4.8B: Identify conductors and insulators of thermal and electrical energy. In plain English: Identify materials that let heat or electricity pass through and materials that resist it. 4.8C: Demonstrate and describe how electrical energy travels in a closed path that can produce light and thermal energy. In plain English: Show that electricity travels around a closed path and can produce light and heat. Today: Observe energy transfer, test materials and build a closed circuit.

I Do

Book connection: Connect stirring, scooping and warming to the week's energy target and record what the action changes. Grade 3: Show a flashlight, shaker, safely lukewarm sealed bottle and moving car. Name light, sound, thermal and mechanical energy. Grade 4: Use moving cars, sound, thermal conductors and a low-voltage battery circuit to observe transfer. Close the path to light a bulb; open it to stop.

We Do

Return to Pumpkin Soup and use its pictures, props or vocabulary as the context. Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same.

You Do

Grade 3: Match an object to its energy form; demonstrate one observable change. Grade 4: Show a transfer or closed circuit and identify what changed.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Two puppets or figures, counters, square tiles, flashlight, shaker, battery circuit kit. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only. Add a visual or prop from Pumpkin Soup that represents this connection.

Book connection for this subject

Pumpkin Soup | Connect stirring, scooping and warming to the week's energy target and record what the action changes.

Social studies

2026-10-27 | Week 3 | Characters take action

Grade 3 | TEKS 3.9C

3.9C: Identify and describe individual acts of civic responsibility, including obeying laws, serving and improving the community, serving on a jury, and voting. In plain English: Describe civic responsibilities such as following laws, helping the community, jury service and voting. Today: Explain how a helpful action serves the community.

Grade 4 | TEKS 4.2B

4.2B: Identify the accomplishments and explain the impact of significant explorers, including Cabeza de Vaca; Francisco Coronado; and René Robert Cavelier, Sieur de la Salle, on the settlement of Texas. In plain English: Explain named explorers' accomplishments and their effects on Texas settlement. Today: Connect a named explorer to an accomplishment.

I Do

Book connection: Practice taking turns, sharing jobs and repairing a disagreement in a classroom community. Grade 3: Explain how a helpful action serves the community. Model with one district source, naming the visible clue. Grade 4: Connect a named explorer to an accomplishment. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Return to Pumpkin Soup and use its pictures, props or vocabulary as the context. Work together with a second example from the same source set. Choose what is same/different or what each source tells us. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Explain how a helpful action serves the community. Grade 4: Connect a named explorer to an accomplishment. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources. Add a visual or prop from Pumpkin Soup that represents this connection.
