Week 6 | Friday checks

2026-11-20 | Three brief items per check. Record accuracy and support separately.

Spelling

Use three words explicitly taught from each learner's current HMH sound-spelling pattern. Say the word, use it in a sentence, repeat it. Record encoding separately from supported pattern recognition. Words: _____ _____ _____.

Grade 3 reading | A Chair for My Mother

Use the actual book, with the planned access supports.

1. Who is here, where are they, and what happens first?

Teacher key: Names or points to the character, setting or event.

2. What does a character do about the problem?

Teacher key: Shows a character action in the selected scene.

3. What happens next or at the end?

Teacher key: Sequences the next or ending event from the book.

Grade 4 reading | A Chair for My Mother

Use the actual book, with the planned access supports.

1. What problem or important event is shown in this scene?

Teacher key: Identifies a problem or important event actually shown.

2. What does a character do, and why?

Teacher key: Explains a character action or choice with support.

3. How does that action affect the result? Show the page or illustration.

Teacher key: Connects the action to the result using page evidence.

Math | Week 6

Grade 3

3.3C | 3.3D

1. Build three fourths using one-fourth pieces.
2. Separate three fourths into two fourths and one fourth.
3. Show that four one-fourth pieces make one whole.

Teacher key

3 unit pieces; 2/4 and 1/4; complete whole

Grade 4

4.3C | 4.3D

1. Compare one half and one fourth using equal-size wholes.
2. Compare three fourths and one fourth.
3. Compare one half and two fourths.

Teacher key

1/2 greater; 3/4 greater; equal

Science | Week 6

Experiment replaces the separate science quiz

Leaf-and-ramp investigation: first observe and sort collected leaves by visible features as ungraded exploration. Test the same toy car on a bare ramp and a securely fixed dry-leaf surface. Grade 3 compares speed and the distance a foam block moves after contact (3.8B); Grade 4 describes the friction pattern (4.7). Keep car, release point and ramp height constant; repeat three trials. Do not infer energy from leaf color. Grade 3 uses the same car and foam block for slow/faster trials, resets the block each time and compares the effects. Grade 4 changes only the track surface for the friction comparison.

Grade 3

3.8B

1. Predict which trial will move the foam block farther.
2. Observe the faster car and the block's movement.
3. Show evidence connecting greater speed with greater effect on the block.

Teacher key

Prediction recorded before trial; correctly identifies observed speed and movement; relates faster motion to a greater observed effect, with other conditions held constant.

Grade 4

4.7

1. Compare the same car on smooth board and felt.
2. Identify which surface slows the car more.
3. Explain or select that friction changes the motion.

Teacher key

Both surfaces tested; felt generally slows more; friction identified

Additional product: Social studies

Writing: one clear idea, relevant detail/reason and understandable communication. Social studies: a correct person/event or community claim, relevant source evidence and supported connection. Score each criterion 0/1 with prompts noted; apply school grading rules.
