Reading and writing

2026-11-09 | Week 5 | Small actions help

Grade 3 | TEKS 3.8C

3.8C: Analyze plot elements, including the sequence of events, the conflict, and the resolution. In plain English: Explain the order of story events, the problem and how it is solved. Today: Identify Rebecca Estelle's pumpkin problem.

Grade 4 | TEKS 4.8B

4.8B: Explain the interactions of the characters and the changes they undergo. In plain English: Explain how characters affect one another and how they change during the story. Today: Explain how Rebecca Estelle feels about pumpkins at the beginning.

I Do

Grade 3: Open Too Many Pumpkins to the matching scene. Say, "We are learning to identify Rebecca Estelle's pumpkin problem." Use Rebecca Estelle figure, pumpkin photos, garden mat, pretend food cards to model one response, then point to the page that supports it. Grade 4: Open Too Many Pumpkins to the matching scene. Say, "We are learning to explain how Rebecca Estelle feels about pumpkins at the beginning." Use Rebecca Estelle figure, pumpkin photos, garden mat, pretend food cards to model one response, then point to the page that supports it.

We Do

Read the scene aloud again. Each learner moves the character props to show the problem, action and result. Ask the Grade 3 learner to retell the events; ask the Grade 4 learner why the action matters. Fade the model; return to the real illustrations before accepting an answer.

You Do

Grade 3: Identify Rebecca Estelle's pumpkin problem. Grade 4: Explain how Rebecca Estelle feels about pumpkins at the beginning. Use one fresh question from a familiar page. Record the response, page/scene and help used.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match familiar props or photos from the already taught scene, sequence two mastered event photos, or use a known Vizzle task. Independent reading is not assumed.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Real books: Too Many Pumpkins. Bring the props and response mats in the weekly book guide.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

After the read-aloud, build one sentence from the evidence: Grade 3 retells an event; Grade 4 explains a character's action with a because statement. Keep HMH phonics/spelling at the assessed pattern; teach three words before Friday's spelling check. Writing TEKS 3.7B / 4.7B: compose a response to the actual text. Dictation or AAC composition is an access option; record the response method. Matching a picture alone is reading evidence, not independent written composition. For Grade 4, add an alike/different sentence comparing an idea in today's book with a previously read book; point to evidence in both sources.

8-9 AM read-aloud

Too Many Pumpkins by Linda White. Return to the real pages for evidence; see the weekly book guide.

Math

2026-11-09 | Week 5 | Small actions help

Grade 3 | TEKS 3.3A, 3.3C

3.3A: Represent fractions greater than zero and less than or equal to one with denominators of 2, 3, 4, 6, and 8 using concrete objects and pictorial models, including strip diagrams and number lines. In plain English: Model fractions from greater than zero through one, using halves, thirds, fourths, sixths and eighths. 3.3C: Explain that the unit fraction 1/b represents the quantity formed by one part of a whole that has been partitioned into b equal parts where b is a non-zero whole number. In plain English: Explain that a unit fraction is one equal part of a whole. Today: Select 3 of the 4 equal parts and show three fourths.

Grade 4 | TEKS 4.5B

4.5B: Represent problems using an input-output table and numerical expressions to generate a number pattern that follows a given rule representing the relationship of the values in the resulting sequence and their position in the sequence. In plain English: Use a rule, an input-output table and expressions to represent a number pattern. Today: Continue 2, 4, 6; then find output 7 for input 5 under add 2.

I Do

Grade 3: Fold an equal-size paper whole into 4 equal parts; select one part and name one fourth. Grade 4: Build 2, 4, 6 counters. Say the rule is add 2. Use an input-output mat to show input 3 gives output 5 under add 2.

We Do

Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations.

You Do

Grade 3: Select 3 of the 4 equal parts and show three fourths. Grade 4: Continue 2, 4, 6; then find output 7 for input 5 under add 2.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention.

Science

2026-11-09 | Week 5 | Small actions help

Grade 3 | TEKS 3.8A

3.8A: Identify everyday examples of energy, including light, sound, thermal, and mechanical. In plain English: Recognize everyday examples of light, sound, thermal and mechanical energy. Today: Identify light, sound, thermal and mechanical energy.

Grade 4 | TEKS 4.8A, 4.8B, 4.8C

4.8A: Investigate and identify the transfer of energy by objects in motion, waves in water, and sound. In plain English: Investigate how moving objects, water waves and sound transfer energy. 4.8B: Identify conductors and insulators of thermal and electrical energy. In plain English: Identify materials that let heat or electricity pass through and materials that resist it. 4.8C: Demonstrate and describe how electrical energy travels in a closed path that can produce light and thermal energy. In plain English: Show that electricity travels around a closed path and can produce light and heat. Today: Observe energy transfer, test materials and build a closed circuit.

I Do

Grade 3: Show a flashlight, shaker, safely lukewarm sealed bottle and moving car. Name light, sound, thermal and mechanical energy. Grade 4: Use moving cars, sound, thermal conductors and a low-voltage battery circuit to observe transfer. Close the path to light a bulb; open it to stop.

We Do

Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same.

You Do

Grade 3: Match an object to its energy form; demonstrate one observable change. Grade 4: Show a transfer or closed circuit and identify what changed.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Fraction pieces, counters, puppets, flashlight, sealed lukewarm bottle, magnet, paper clips, felt, board. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only.

Social studies

2026-11-09 | Week 5 | Small actions help

Grade 3 | TEKS 3.14A

3.14A: Gather information, including historical and current events and geographic data, about the community using a variety of resources. In plain English: Gather community information from different sources, including history, current events and geography. Today: Notice who made a historical source.

Grade 4 | TEKS 4.3A

4.3A: Analyze the causes, major events, and effects of the Texas Revolution, including the Battle of the Alamo, the Texas Declaration of Independence, the Runaway Scrape, and the Battle of San Jacinto. In plain English: Explain causes, major events and effects of the Texas Revolution. Today: Identify a cause of the Texas Revolution.

I Do

Grade 3: Notice who made a historical source. Model with one district source, naming the visible clue. Grade 4: Identify a cause of the Texas Revolution. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Work together with a second example from the same source set. Teacher models looking for one visible clue at a time. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Notice who made a historical source. Grade 4: Identify a cause of the Texas Revolution. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources.
