Reading and writing

2026-12-02 | Week 7 | Create together

Grade 3 | TEKS 3.8C

3.8C: Analyze plot elements, including the sequence of events, the conflict, and the resolution. In plain English: Explain the order of story events, the problem and how it is solved. Today: Sequence the problem, action and result.

Grade 4 | TEKS 4.9D(i)

4.9D(i): Recognize characteristics and structures of informational text, including: the central idea with supporting evidence. In plain English: Identify an informational text's central idea and the details that support it. Today: Connect a fact to the central idea.

I Do

Open the actual book to a prepared scene. State each grade's target above. Model choosing a relevant illustration to answer a question. Explain how it supports the answer. Point to the exact illustration or sentence that makes the answer reasonable.

We Do

Compare one relevant illustration with an unrelated object; then select evidence together. Return to the real page after acting. Ask the learner to show the book evidence, not just remember the prop.

You Do

Grade 3: Sequence the problem, action and result. Grade 4: Connect a fact to the central idea. Ask a fresh question about a familiar bookmarked page. Accept the planned response mode and save the page/scene with the response.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match familiar props or photos from the already taught scene, sequence two mastered event photos, or use a known Vizzle task. Independent reading is not assumed.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Real books: A Chair for My Mother / Action Jackson. Bring the props and response mats in the weekly book guide.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

After the read-aloud, build one sentence from the evidence: Grade 3 states an opinion about helping and gives a reason; Grade 4 writes or dictates an informational fact about the artist. Keep HMH phonics/spelling at the assessed pattern; teach three words before Friday's spelling check. Writing TEKS 3.7B / 4.7B: compose a response to the actual text. Dictation or AAC composition is an access option; record the response method. Matching a picture alone is reading evidence, not independent written composition. For Grade 4, add an alike/different sentence comparing an idea in today's book with a previously read book; point to evidence in both sources.

Math

2026-12-02 | Week 7 | Create together

Grade 3 | TEKS 3.3F, 3.3G

3.3F: Represent equivalent fractions with denominators of 2, 3, 4, 6, and 8 using a variety of objects and pictorial models, including number lines. In plain English: Use models or number lines to show equivalent fractions. 3.3G: Explain that two fractions are equivalent if and only if they are both represented by the same point on the number line or represent the same portion of a same size whole for an area model. In plain English: Explain why equivalent fractions mark the same point or cover the same amount of an equal-size whole. Today: Match one third with two sixths and show that the amounts are equal.

Grade 4 | TEKS 4.3C, 4.3D

4.3C: Determine if two given fractions are equivalent using a variety of methods. In plain English: Determine whether two fractions name the same amount. 4.3D: Compare two fractions with different numerators and different denominators and represent the comparison using the symbols >, =, or <. In plain English: Compare fractions with different numerators and denominators using >, = or <. Today: Compare one half with three fourths using matching whole lengths.

I Do

Grade 3: Line up equal-length whole strips. Compare one half with two fourths; their endpoints match. Grade 4: Place one half and one fourth on equal-size wholes. Show the greater amount and compare two fourths with one half.

We Do

Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations. Grade 4: compare 1/2 and 3/4 on equal-length wholes and record 1/2 < 3/4. This pair has different numerators and denominators.

You Do

Grade 3: Match one third with two sixths and show that the amounts are equal. Grade 4: Compare one half with three fourths using matching whole lengths.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention.

Science

2026-12-02 | Week 7 | Create together

Grade 3 | TEKS 3.8B

3.8B: Plan and conduct investigations that demonstrate how the speed of an object is related to its mechanical energy. In plain English: Plan and carry out a test connecting an object's speed to its mechanical energy. Today: Compare slow and faster runs of the same car; use the effect on a foam block to explain the relationship between speed and mechanical energy.

Grade 4 | TEKS 4.7

4.7: Plan and conduct descriptive investigations to explore the patterns of forces such as gravity, friction, or magnetism in contact or at a distance on an object. In plain English: Plan and conduct investigations to find patterns in gravity, friction or magnetism. Today: Test a pattern in gravity, friction or magnetism.

I Do

Grade 3: Release the same car from a low ramp and a higher ramp. Keep the car and surface the same. Faster movement has more mechanical energy. Grade 4: Compare the same car on smooth board and felt; test a magnet near a paper clip; release a ball into a tray.

We Do

Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same. Grade 3: plan two releases of the same car, one slow and one faster, into the same lightweight foam block. Keep the car, block, surface and collision point fixed; reset the block and repeat three trials per condition. Record observed speed and how far the block moves. Use the greater observed effect as evidence about mechanical energy; do not use travel distance alone as a speed measurement.

You Do

Grade 3: Identify the observed faster run and point to evidence. Grade 4: Show friction, magnetic attraction or gravity using observed evidence.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Paper, glue sticks, collage scraps, fraction strips, toy car, ramp, magnet, clip, craft stick. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only.

Social studies

2026-12-02 | Week 7 | Create together

Grade 3 | TEKS 3.2B

3.2B: Compare ways in which people in the local community and other communities meet their needs for government, education, communication, transportation, and recreation. In plain English: Compare how communities meet needs such as government, education, transportation and recreation. Today: Compare how two communities meet the same need.

Grade 4 | TEKS 4.3D

4.3D: Describe the successes, problems, and organizations of the Republic of Texas such as the establishment of a constitution, economic struggles, relations with American Indians, and the Texas Rangers. In plain English: Describe the Republic of Texas's successes, problems and organizations. Today: Describe one success of the Republic.

I Do

Grade 3: Compare how two communities meet the same need. Model with one district source, naming the visible clue. Grade 4: Describe one success of the Republic. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Work together with a second example from the same source set. Place one item where it belongs and answer one evidence question. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Compare how two communities meet the same need. Grade 4: Describe one success of the Republic. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources.
