Reading and writing

2026-10-15 | Week 1 | People solve problems

Grade 3 | TEKS 3.9D(i)

3.9D(i): Recognize characteristics and structures of informational text, including: the central idea with supporting evidence. In plain English: Identify an informational text's central idea and the details that support it. Today: Show how a growth detail supports the book's main idea.

Grade 4 | TEKS 4.8A

4.8A: Infer basic themes supported by text evidence. In plain English: Work out a story's message and support it with evidence from the text. Today: Explain a message about helping, using a scene as evidence.

I Do

Read a short, accessible scene from Room on the Broom. Grade 3: say, "We are learning to show how a growth detail supports the book's main idea." and model one response with a picture, prop or dictated sentence. Grade 4: say, "We are learning to explain a message about helping, using a scene as evidence." and model a response that points to the same scene as evidence.

We Do

Reread the same scene aloud. Both learners handle the same book, illustrations and props. Grade 3 practices the target by arranging, pointing, speaking, using AAC or dictating a response. Grade 4 practices the separate target by explaining, comparing or citing evidence from that same scene. Fade the model, return to the page, then switch teacher rotations.

You Do

Use one fresh question about Room on the Broom. Grade 3: Show how a growth detail supports the book's main idea. Grade 4: Explain a message about helping, using a scene as evidence. Record each response, the page or illustration used and the help given.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: The learner not with the teacher uses a previously taught response sort, scene sequence, prop match or known Vizzle task from Room on the Broom; the teacher then switches and teaches the other learner from the same scene.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Real books: Room on the Broom. Bring the props and response mats in the weekly book guide.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

After the shared read-aloud, each learner makes an individual response from the same book. Grade 3: Show how a growth detail supports the book's main idea. Grade 4: Explain a message about helping, using a scene as evidence. Use the planned response mode and record composition separately from oral or picture evidence.

8-9 AM read-aloud

Room on the Broom by Julia Donaldson. Return to the real pages for evidence; see the weekly book guide.

Math

2026-10-15 | Week 1 | People solve problems

Grade 3 | TEKS 3.4H, 3.4J

3.4H: Determine the number of objects in each group when a set of objects is partitioned into equal shares or a set of objects is shared equally. In plain English: Find how many objects are in each group after sharing equally. 3.4J: Determine a quotient using the relationship between multiplication and division. In plain English: Use a related multiplication fact to solve a division problem. Today: Share 6 counters between 2 plates, then show how many are in each group.

Grade 4 | TEKS 4.4E, 4.4F

4.4E: Represent the quotient of up to a four-digit whole number divided by a one-digit whole number using arrays, area models, or equations. In plain English: Model division of up to a four-digit number by a one-digit number. 4.4F: Use strategies and algorithms, including the standard algorithm, to divide up to a four-digit dividend by a one-digit divisor. In plain English: Use division strategies and the standard algorithm with up to four-digit dividends and one-digit divisors. Today: Build a fresh equal-sharing example and identify the quotient.

I Do

Grade 3: Share 8 counters between 2 plates; each plate receives 4. Connect the model to 8 / 2 = 4. Grade 4: Share 12 counters among 3 cups; connect 4 in each cup to 12 / 3 = 4.

We Do

Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations. Grade 3: after sharing 8 into 2 equal groups, use 2 x 4 = 8 to explain why 8 / 2 = 4. Grade 4: connect 12 / 3 to the written division algorithm: divide 12 ones into 3 groups, write 4, multiply 4 x 3, subtract 12, and show remainder 0. Extend with place-value blocks to 132 / 3 = 44 when ready; preserve the same place-value steps.

You Do

Grade 3: Share 6 counters between 2 plates, then show how many are in each group. Grade 4: Build a fresh equal-sharing example and identify the quotient.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention.

Science

2026-10-15 | Week 1 | People solve problems

Grade 3 | TEKS 3.7A, 3.7B

3.7A: Demonstrate and describe forces acting on an object in contact or at a distance, including magnetism, gravity, and pushes and pulls. In plain English: Show and explain pushes, pulls, gravity and magnetism, including forces that act without touching. 3.7B: Plan and conduct a descriptive investigation to demonstrate and explain how position and motion can be changed by pushing and pulling objects such as swings, balls, and wagons. In plain English: Plan and carry out a test showing how pushes and pulls change position or motion. Today: Show how a push or pull changes motion.

Grade 4 | TEKS 4.6B, 4.6C

4.6B: Investigate and compare a variety of mixtures, including solutions that are composed of liquids in liquids and solids in liquids. In plain English: Investigate and compare mixtures, including liquids mixed with liquids and solids with liquids. 4.6C: Demonstrate that matter is conserved when mixtures such as soil and water or oil and water are formed. In plain English: Show that matter is still present when materials are combined into a mixture. Today: Compare a mixture and a solution; use before/after mass readings of the same closed container to show that matter is conserved.

I Do

Grade 3: Use a toy car to model a push and pull; contact can change an object's motion. Grade 4: Mix dry beans with large pasta, then separate them. Mix sugar into water and observe that it is still present even when not visible. For conservation, weigh a lidded clear container holding separate soil and water before mixing. Mix without opening or spilling, then weigh the same closed system again. Compare readings; the materials remain even though their arrangement changes.

We Do

Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same. Grade 4 repeats the closed-container before/after weighing and records both readings. Compare a soil-water mixture with a sugar-water solution and a liquid-liquid mixture such as oil and water. Do not taste the materials. Grade 3 chooses a push or pull to test, predicts the position change, marks the start, tries it and describes the observed result.

You Do

Grade 3: Show a push or pull that changes the car's position. Grade 4: Identify a separable mixture and describe the sugar-water observation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, 3 plates, toy car, tray, dry beans, large pasta, clear cup, sugar, spoon. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only.

Social studies

2026-10-15 | Week 1 | People solve problems

Grade 3 | TEKS 3.9C

3.9C: Identify and describe individual acts of civic responsibility, including obeying laws, serving and improving the community, serving on a jury, and voting. In plain English: Describe civic responsibilities such as following laws, helping the community, jury service and voting. Today: Choose a helpful action and explain its effect.

Grade 4 | TEKS 4.2B

4.2B: Identify the accomplishments and explain the impact of significant explorers, including Cabeza de Vaca; Francisco Coronado; and René Robert Cavelier, Sieur de la Salle, on the settlement of Texas. In plain English: Explain named explorers' accomplishments and their effects on Texas settlement. Today: Explain one effect of an explorer's actions.

I Do

Grade 3: Choose a helpful action and explain its effect. Model with one district source, naming the visible clue. Grade 4: Explain one effect of an explorer's actions. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Work together with a second example from the same source set. Look at a photo, map, or artifact image and answer one "What does this show?" question. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Choose a helpful action and explain its effect. Grade 4: Explain one effect of an explorer's actions. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources.
