Reading and writing

2026-10-29 | Week 3 | Characters take action

Grade 3 | TEKS 3.9C

3.9C: Discuss elements of drama such as characters, dialogue, setting, and acts. In plain English: Recognize and discuss the characters, spoken lines, setting and acts in a play. Today: Use dialogue and character roles to act the pumpkin problem and solution.

Grade 4 | TEKS 4.8A

4.8A: Infer basic themes supported by text evidence. In plain English: Work out a story's message and support it with evidence from the text. Today: Support a message about teamwork with the pumpkin-pulling scene.

I Do

Read a short, accessible scene from Pumpkin Soup. Grade 3: say, "We are learning to use dialogue and character roles to act the pumpkin problem and solution." and model one response with a picture, prop or dictated sentence. Grade 4: say, "We are learning to support a message about teamwork with the pumpkin-pulling scene." and model a response that points to the same scene as evidence.

We Do

Reread the same scene aloud. Both learners handle the same book, illustrations and props. Grade 3 practices the target by arranging, pointing, speaking, using AAC or dictating a response. Grade 4 practices the separate target by explaining, comparing or citing evidence from that same scene. Fade the model, return to the page, then switch teacher rotations.

You Do

Use one fresh question about Pumpkin Soup. Grade 3: Use dialogue and character roles to act the pumpkin problem and solution. Grade 4: Support a message about teamwork with the pumpkin-pulling scene. Record each response, the page or illustration used and the help given.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: The learner not with the teacher uses a previously taught response sort, scene sequence, prop match or known Vizzle task from Pumpkin Soup; the teacher then switches and teaches the other learner from the same scene.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Real books: Pumpkin Soup. Bring the props and response mats in the weekly book guide.

Writing TEKS 3.7B

Write a response to a literary or informational text that demonstrates an understanding of a text.

Writing TEKS 4.7B

Write responses that demonstrate understanding of texts, including comparing and contrasting ideas across a variety of sources.

Writing and spelling

After the shared read-aloud, each learner makes an individual response from the same book. Grade 3: Use dialogue and character roles to act the pumpkin problem and solution. Grade 4: Support a message about teamwork with the pumpkin-pulling scene. Use the planned response mode and record composition separately from oral or picture evidence.

8-9 AM read-aloud

Big Pumpkin by Erica Silverman. Return to the real pages for evidence; see the weekly book guide.

Math

2026-10-29 | Week 3 | Characters take action

Grade 3 | TEKS 3.5E

3.5E: Represent real-world relationships using number pairs in a table and verbal descriptions. In plain English: Use pairs of numbers in a table to describe a real-world relationship. Today: Build 4 bags with 2 supplies each; complete 4 / 8 in the table and explain the relationship.

Grade 4 | TEKS 4.5C, 4.5D

4.5C: Use models to determine the formulas for the perimeter of a rectangle (l + w + l + w or 2l + 2w), including the special form for perimeter of a square (4s) and the area of a rectangle (l x w). In plain English: Use models to explain rectangle area and perimeter formulas. 4.5D: Solve problems related to perimeter and area of rectangles where dimensions are whole numbers. In plain English: Solve rectangle area and perimeter problems with whole-number side lengths. Today: Build a 2 by 4 rectangle; show area 8 square units and perimeter 12 units.

I Do

Grade 3: Put 2 supplies in each bag. Build a two-column table: 1 bag / 2 supplies, 2 bags / 4 supplies, 3 bags / 6 supplies. Explain the relationship: two supplies for each bag. Grade 4: Cover a 2 by 3 rectangle with 6 unit squares. Trace and count the 10 unit edges around the outside.

We Do

Both students handle the shared materials. Practice one example with the teacher; then teach the two targets in separate rotations. Grade 4: connect the 2-by-3 tile model to A = 2 x 3 and P = 2 + 3 + 2 + 3. Use the model to explain why area multiplies rows and columns and perimeter adds all four edges.

You Do

Grade 3: Build 4 bags with 2 supplies each; complete 4 / 8 in the table and explain the relationship. Grade 4: Build a 2 by 4 rectangle; show area 8 square units and perimeter 12 units.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Complete a mastered counting/sorting tray or known Bridges practice task at the student's established level.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Counters, plates/cups and the linked math mat. Select the matching grade-level STEMscopes lesson. Use Bridges placement to choose a separate foundational intervention.

Science

2026-10-29 | Week 3 | Characters take action

Grade 3 | TEKS 3.8A

3.8A: Identify everyday examples of energy, including light, sound, thermal, and mechanical. In plain English: Recognize everyday examples of light, sound, thermal and mechanical energy. Today: Identify light, sound, thermal and mechanical energy.

Grade 4 | TEKS 4.8A, 4.8B, 4.8C

4.8A: Investigate and identify the transfer of energy by objects in motion, waves in water, and sound. In plain English: Investigate how moving objects, water waves and sound transfer energy. 4.8B: Identify conductors and insulators of thermal and electrical energy. In plain English: Identify materials that let heat or electricity pass through and materials that resist it. 4.8C: Demonstrate and describe how electrical energy travels in a closed path that can produce light and thermal energy. In plain English: Show that electricity travels around a closed path and can produce light and heat. Today: Observe energy transfer, test materials and build a closed circuit.

I Do

Grade 3: Show a flashlight, shaker, safely lukewarm sealed bottle and moving car. Name light, sound, thermal and mechanical energy. Grade 4: Use moving cars, sound, thermal conductors and a low-voltage battery circuit to observe transfer. Close the path to light a bulb; open it to stop.

We Do

Predict with objects or pictures, test together, then identify what changed. Keep one test variable different and other relevant conditions the same.

You Do

Grade 3: Match an object to its energy form; demonstrate one observable change. Grade 4: Show a transfer or closed circuit and identify what changed.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Sort familiar object/photo matches away from the experiment station. Experiments are adult supervised.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

Two puppets or figures, counters, square tiles, flashlight, shaker, battery circuit kit. Adult manages circuit parts, magnets, small items and warm materials; use a low-voltage kit only.

Social studies

2026-10-29 | Week 3 | Characters take action

Grade 3 | TEKS 3.9C

3.9C: Identify and describe individual acts of civic responsibility, including obeying laws, serving and improving the community, serving on a jury, and voting. In plain English: Describe civic responsibilities such as following laws, helping the community, jury service and voting. Today: Choose a helpful action and explain its effect.

Grade 4 | TEKS 4.2B

4.2B: Identify the accomplishments and explain the impact of significant explorers, including Cabeza de Vaca; Francisco Coronado; and René Robert Cavelier, Sieur de la Salle, on the settlement of Texas. In plain English: Explain named explorers' accomplishments and their effects on Texas settlement. Today: Explain one effect of an explorer's actions.

I Do

Grade 3: Choose a helpful action and explain its effect. Model with one district source, naming the visible clue. Grade 4: Explain one effect of an explorer's actions. Use the current Texas history map, image or excerpt; name the person/event and point to the evidence.

We Do

Work together with a second example from the same source set. One picture + one dictated sentence or symbol-based response. Keep the grade-specific question visible and fade added hints.

You Do

Grade 3: Choose a helpful action and explain its effect. Grade 4: Explain one effect of an explorer's actions. Use a fresh source/card; accept a model, pointing, AAC or a spoken explanation.

Rotate and switch

Teacher with Grade 3 for 8-10 minutes while Grade 4 uses the taught independent task; switch. Match supports to each learner, not the grade label. Independent task: Match two familiar source pictures or complete a known picture-to-object task.

Access and participation

Use objects or two clear choices, the learner's planned response method and wait time. Offer a private response or equivalent retry when needed; record extra help and no response separately.

Evidence and progress

Save one dated response for each grade's target above: a model/photo, selected answer, dictated sentence or work sample. Record correct / total and extra prompts separately. This is practice evidence unless today is a scheduled graded product. Use it for IEP progress only if it measures the actual goal under its required conditions; goals are awaiting upload.

Materials

District source pictures or excerpts, two-event sequence mat and writing/history frames. The classroom texts do not replace Texas history sources.
