Week 1 | Friday checks

2026-10-16 | Three brief items per check. Record accuracy and support separately.

Spelling

Use three words explicitly taught from each learner's current HMH sound-spelling pattern. Say the word, use it in a sentence, repeat it. Record encoding separately from supported pattern recognition. Words: _____ _____ _____.

Grade 3 reading | Room on the Broom

Use the actual book, with the planned access supports.

1. Who is here, where are they, and what happens first?

Teacher key: Names or points to the character, setting or event.

2. What does a character do about the problem?

Teacher key: Shows a character action in the selected scene.

3. What happens next or at the end?

Teacher key: Sequences the next or ending event from the book.

Grade 4 reading | Room on the Broom

Use the actual book, with the planned access supports.

1. What problem or important event is shown in this scene?

Teacher key: Identifies a problem or important event actually shown.

2. What does a character do, and why?

Teacher key: Explains a character action or choice with support.

3. How does that action affect the result? Show the page or illustration.

Teacher key: Connects the action to the result using page evidence.

Math | Week 1

Grade 3

3.4H | 3.4J

1. Share 6 counters equally between 2 plates; show how many are on each.

2. Use 2 x 3 = 6 to explain 6 / 2.

3. Make 2 groups of 3 and show the total with a multiplication model.

Teacher key

3 on each; quotient 3 connected to the multiplication fact; 6 total with equal groups.

Grade 4

4.4E | 4.4F

1. Model 12 / 3 and record an equation.

2. Use the written division steps to solve 15 / 3; show how the model matches.

3. Check the quotient in 12 / 3 using multiplication.

Teacher key

4; 5 with divide/multiply/subtract steps and remainder 0; 3 x 4 = 12. Small-number access evidence, not full four-digit mastery.

Science | Week 1

Grade 3

3.7A | 3.7B

1. Push a toy car. Show what changed.

2. Pull a toy wagon toward you. Name or select pull.

3. Predict what happens when a ball is released above a tray.

Teacher key

Position or motion changes; pull; ball falls due to gravity

Grade 4

4.6B | 4.6C

1. Compare soil mixed with water and sugar mixed with water. Describe one observed difference.

2. Record the mass of the same closed soil-water container before and after mixing.

3. Use the readings to explain whether any matter was lost.

Teacher key

Soil may settle/remain visible; dissolved sugar is not separately visible. Before and after readings agree within scale resolution if nothing spills. Same materials remain; equal readings support conservation.

Additional product: Writing

Writing: one clear idea, relevant detail/reason and understandable communication. Social studies: a correct person/event or community claim, relevant source evidence and supported connection. Score each criterion 0/1 with prompts noted; apply school grading rules.
